

## AHA-9710 Series

AHA-9710 is a handling system for metal bars, moving a bar from storing place through the cutter AHA-9700 and sort into different lengths.

The store can handle bars up to 6,2 m (21 feet) and diameters between 10 to 50 mm (3/8" - 2"). Up to 3 tons of bars can be loaded at the same time.

Simple programming: length and numbers. The AHA 9710 starts and counts up to the ordered numbers is achieved.

The machine is fast, 1 bar can be divided into 6 pieces in less than a minute.
